

About viewing other users' roles

You can view the roles assigned to another user to see which actions that user can take in the projects and libraries to which she or he has access.

Your ability to view the roles that are assigned to other users depends on the following factors:

- The type of system in which you are working (stand-alone or integrated)
- Your ability to manage access for other users, based on the user rights that you are assigned

The following table describes the requirements for viewing other users' roles at the customer, project, and library levels:

To view the roles assigned to other users	You must have these roles and user rights		And view the roles in
	In a stand-alone system	In an integrated system	A Web browser
