

Using the Preps Template Migration Utility

What does the Preps Template Migration Utility (PTMU) do?

After you install the latest version of Preps, you may want to copy or move the templates, marks, and jobs from your older version of Preps to the new version.

PTMU migrates templates and marks within the Preps Resource folder. It converts static marks to SmartMarks and verifies the internal naming structure of the templates. It will also convert .job files, which is helpful if you reuse them on a regular basis.

Where can I find the PTMU?

PTMU resides in the Utilities folder in the Preps Application folder.
