

Using an existing fold pattern with modified page numbering

Requirements:

1. Select the **Fold Pattern** that contains the correct number of horizontal and vertical pages.
2. Click on the **Page Numbering** tool.
3. Find page 1, and continue to number the pages until all the pages have been numbered.
4. Select **File > Save As Custom Fold Pattern**.
5. In the **Custom Name** field, enter a descriptive name for the result.
6. In the **Save in Group** field, you can also:
 - a. Change the group that this fold pattern is associated with.
To create a new group, type the new name in the **Save in Group** box. It will be automatically created when you click **OK** to save the Custom Fold Pattern.
 - b. Enter a **New Group Name** if required.
7. Click **OK**.

The fold pattern name now appears in the **Custom Fold Patterns** list, **Fold Sets** lists, and **Fold Patterns** list in the Layouts resource and Properties panes. The software stores the list details in the CustomFoldingPatterns.xml file in the Resources folder.

Note: Standard fold patterns are never affected by edits that you make when creating a custom fold pattern.
