

Layout dimensions in the workspace

Set preferences, select **View** menu options, and click workspace tools to control the display of dimensions in the workspace.

- The default unit, distance measurement type, and snap type are defined on the **General** tab in the Preferences dialog box.
- In the workspace, most applicable text boxes become editable when you click a page or section. Some can be edited only in the **Properties** pane.
- Measurements that are not in an editable state appear in dimmed text boxes with no borders.
- A lock icon  appears on any pages or sections that cannot be repositioned. (Marks are locked by default.) Objects that can be locked or unlocked include a check box in their **Properties** pane, or you can use the **Objects** menu.
- If you edit the distance between a locked, ganged page and an adjacent page, the locked page does not move, even if it is the page that you selected. Only the adjacent page moves.

Measurement	Description
Page or page group dimensions 	Select Show Page Sizes to display gray lines and text boxes for the width and height of a selected group. A dashed blue border indicates a selected group. Finished page dimensions can be edited only on the Template Page tab in the Properties pane. The dimensions of a placed media or stock cannot be edited in the workspace.
Margins between stock edge and selected page, section, or media edges 	Lines and text boxes indicate sheet margins, and you can edit the text boxes to reposition the objects.

Center to center distances 	Select Show Dimensions to display lines and text boxes for the distances between the centers of equal-sized and aligned objects.
Trim edge to trim edge distances 	Select Show Dimensions to display lines between the edges of a selected object (page or section) and any adjacent edges of the same object type, such as to show gap, gutter, or trim widths.

Note:

- A *gutter* is the space between the trim edges of any two rows of pages or sections on a press sheet, as in pages within a ganged page group or an imposition page grid.
- A *gap* is the space between two independent (or ganged) pages on a press sheet.
- A *trim* is a gutter or margin area that will be trimmed from a final page.
