

Custom Size dialog box

In the Media Configuration dialog box, click **Custom Size**.

Option	Description
Name	Type a descriptive name for this media size. The name can be up to 40 characters long and must not include any special characters, spaces, slashes (/ or \), colons (:), tabs, or new line characters.
Width, Height	Specify the dimensions of the custom media.
Orientation	The availability of orientations depends on the capabilities of the device and always includes 0, which is the default device orientation as defined in the PPD. The default can be 0, 90, 180, or 270 degrees, depending on what the RIP uses as the load edge. Custom media orientation settings 1, 2, and 3, if available, rotate the orientation in 90-degree increments.
