

Preps Administration

Use the administrative tools and techniques described in this section to set up and manage your imposition workflow for efficient operation and diagnostics.

For example, you can:

- [Configure preference settings that suit your typical requirements and store them in reusable profiles.](#)
- [Ensure that folder paths are configured in a way that makes it easy to retrieve the various file types that are required during imposition.](#)
- [Set up job notes to provide the content for text mark variables.](#)
- [Set up the software licensing.](#)
- [Review status information about job activities.](#)
