

Common Preferences

You can load or save a profile from any tab in the Preferences dialog box.

In Mac OS: Select **Preps > Preferences**.

In Microsoft Windows: Select **Edit > Preferences**.

Profile Name

Lists the profiles that currently exist in a folder in the **Profiles** folder

Save Profile

Saves your current settings to a profile. In the dialog box that appears, you can select a profile from the **Profile Name** list, or type a name for the new profile that is then automatically added to the Profiles folder.

Language (Windows only)

Displays all the user interface options in the selected language.

Note: This setting does not change the measurement unit, which you can set separately.
