

Folders Preferences

In Mac OS: Select **Preps > Preferences > Folders**.

In Microsoft Windows: Select **Edit > Preferences > Folders**.

Option	Description
Temporary Folder	Displays the folder that the software uses while processing files
Templates, Marks, and Resources Folder	Specify the parent folder that contains the Templates, Marks, and Resources folders. You can specify a central folder for multiple installations.
Printers Folder	Specify the folder that stores all the media configuration and PPD files. You can specify a central folder for multiple installations.
Output Path	Select the default location for output files. This path is presented by default when you print to a file type. To retain the last-used output folder as the default for the next time you print, select the Use last location check box. The Output Path displays Use last location instead of an actual path. To cancel, click Select , and set the path to a fixed location.
PDF Output Path	Select the default location for your PDF output files.
Compensation Sets Path	Specify the folder that stores the web-growth compensation sets for this installation.
