

System Requirements

Qualified operating systems

Microsoft Windows

- Windows Client: Microsoft Windows Pro 10* or 11
- Microsoft Windows Enterprise 10* or 11
- Microsoft Windows Server 2019 or 2022.
 - **Compatibility Note:*** Microsoft Windows IoT 10 or 11 and Microsoft Windows IoT Enterprise 11 are not qualified.

*Windows 10 Support and Compatibility with VPS+11.6

Standard support for Windows 10 from Microsoft ended in 2025, though customers may choose to purchase extended support directly from Microsoft. Windows 10 has been qualified as a client operating system for use with VPS+ 11.6. However, if issues arise that appear to be related to the operating system, Kodak recommends upgrading to Windows 11 for improved support and compatibility.

Apple Macintosh

- macOS Tahoe 26.x
- macOS Sequoia 15.x
- macOS Sonoma 14.x

**It is not economically possible for Kodak to individually test every processor model or subtype, whether from Apple®, Intel®, or AMD. We use current development hardware and software to build and test the Prinergy suite of software. We trust the millions of dollars of compatibility testing performed by the chip manufacturers and operating system vendors to ensure that VPS+ will perform correctly on all systems."*

Workstation space requirements

Required installation space

- On Windows — 500 MB (minimum)
- On Mac — 300 MB (minimum)

Hard-drive cache space

- 2GB free space (recommended)
