

VPS+ User Interface

VPS+ User Interface Menu items and Toolbar Icons change, depending on which Mode you are using.

See [Commercial Mode vs Packaging Mode](#)

- **Menu** items (dependent on Mode)
- **Toolbar Icons** (dependent on Mode)
- **Workspace**: Large blank area when no file is currently open
- **Display Windows**: Appears within the workspace when you open a TIFF file or layout, and has the following components:
 - Title bar with the name of the displayed file or imposition name and layout specifications (dependent on Mode)
 - Preview windows can be selected and made active under the **Window** menu, and the active preview window will have a check mark beside it.
 - VPS/TIFF composite file preview or layout with placed TIFF elements
 - Status bar at the bottom that displays information about the displayed file
 - X/Y position of the cursor displays in the bottom left-hand corner of the status bar
 - Width and Height of the image displays in the bottom right-hand corner of the status bar
- **Information Panels** appear on the right side of the workspace by default, but can be freely moved outside the main UI window
 - Information Panels can be made visible or hidden by selecting them under the **Window** menu. Visible panels will have a check mark beside them.
 - **Navigator**: Displays a thumbnail image of everything in the currently active display window
 - **Inventory**: Provides information about files, separations, masks, and marks (exact information displayed depends on Mode)
 - **Info**: Provides information about selected elements in a layout (depends on Mode)
