

Info...

The **File Information** panel displays technical information about the separation file currently opened.

To view File Information, select **Info...** from the **File** Menu, *or* select a color separation in the **Inventory/Separations panel** and press the **Info button**  in the bottom-right corner of the panel.

The information you see depends on whether **Show Advanced information** is checked in **General Preferences** or not. (**Note:** you must be in Packaging Mode in order to see General Preferences.)

Without Show Advanced Information (Default), the following information is displayed:

- **Name:** Name of the selected file
- **Type:** File format and compression type
- **Size:** In Kilobytes (KB)
- **Separation:** File color name
- **Dimension X:** In chosen units and pixels
- **Dimension Y:** In chosen units and pixels
- **Resolution X:** In chosen units and pixels
- **Resolution Y:** In chosen units and pixels
- **Creator:** Creator application
- **Created:** Creation date

With Show Advanced Information, the following information is displayed:

- **Name:** Name of the selected file
- **Type:** File format and compression type
- **Size:** In Kilobytes (KB)
- **Separation:** File color name
- **Dimension X:** In chosen units and pixels
- **Dimension Y:** In chosen units and pixels

- **Resolution X:** In chosen units and pixels
- **Resolution Y:** In chosen units and pixels
- **Creator:** Creator application
- **Created:** Creation date
- **Ink coverage:** In percent and chosen units²
