

Viewing information related to screening

You can check the average tint value, mesh (frequency) and angle of a rectangular area in the 1-bit TIFF file.

1. On the toolbar, click .
2. In the layout window, drag the pointer over the area you want to check in the image.
The values of tint average, mesh (frequency) and angle of the selected screened area are displayed on the **Separations** tab of the **Inventory** palette.
