

Rotating the layout or an element in the layout

Rotating the layout:

You may want to rotate the layout while you are defining the layout setup parameters or right before you output the layout.

1. From the **File** menu, select **Layout Setup** or **Output**.
2. Select the **Rotate** check box and, from the list, select the required degree of rotation (**90°**, **180°**, or **270°**).

Rotating an element in the layout:

You can rotate any element that you place in the layout.

1. In the layout window, select the element that you want to rotate.
2. From the **Info** palette, on the **Element** tab, from the **Rotate** box, select the required rotation: **0°**, **90°**, **180°**, or **270°**.
