

Defining the placement of marks and labels on a step-and-repeat layout

When you step and repeat an element on the **S&R** tab of the **Info** palette, you can define how marks and labels are placed on the layout. This definition affects all of the page marks that are selected for this S&R instance.

Once Inserts marks only on the outer corners of the group of repeated elements.	
Per Copy Inserts marks around each repeated element.	
Outside Inserts marks only around the outside of the imposition.	

1. On the **S&R** tab of the **Info** palette, in the **Marks Placement** section, select one of the following options: **Once**, **Per Copy**, **Outside**.
2. Press **Enter**.
