

# Using registration marks with a corrugated job

## Adding registration marks to a corrugated job

1. In the **Inventory** palette, clear the check box beside any separation that should not have a mark added to it.
2. Click the **Registration Mark**  tool, and then, in the display window, click the point where you want to add the mark.  
In the display window, the mark appears in orange when it is selected and in black when it is not selected. Each mark also appears with an ID number in the list of registration marks on the Marks tab of the **Inventory** palette.

Alternate method:

1. In the **Inventory** palette, clear the check boxes beside all but one of the separations.
2. Add the mark.
3. In the **Marks** tab, select the mark, right-click it, and select **Apply To** for the relevant separations.

## Adding a registration mark aligned with neighboring marks

1. Click the **Registration Mark**  tool.
2. Press Shift, and, in the display window, move the mouse pointer to the area where you want to add the mark.  
A guide is displayed and the new mark is added in alignment to the marks close to it.

## Aligning registration marks

1. Click the **Select**  tool and, in the display window, click the marks (or drag the pointer around the marks) that you want to select.
2. In the display window, right-click one of the selected marks and select **Align Marks**.

Alternate method:

1. In the **Inventory** palette, on the **Marks** tab, select the marks that you want to align.
2. Right-click the marks and select **Align Marks**.

## Applying registration marks to another separation

1. Click the **Select**  tool and, in the display window, click the marks (or drag the pointer around the marks) that you want to select.
2. In the display window, right-click one of the selected marks and select **Apply to**, and then select the separation to which you want to add the marks.

Alternate method:

1. In the **Inventory** palette, on the **Marks** tab, select the marks that you want to apply to another separation.
2. Right-click the marks and select **Apply to**.

3. Select the separation to which you want to add the marks.

Alternate method:

1. Select the marks that you want to apply to another separation.
2. From the **Inventory** palette, on the **Separations** tab, select the separations to which you want to add the marks.

### Removing a registration mark

1. Click the **Select**  tool and, in the display window, click the marks (or drag the pointer around the marks) that you want to select.
2. In the display window, right-click the selected mark or marks and select **Remove**.

Alternate method:

From the **Inventory** palette, on the **Marks** tab, select the mark or marks that you want to delete and click .
