

## VPS+ Creating a Print Layout Report for a corrugated job (Packaging mode)

When you finish planning and creating the corrugated job, you can print a file in PDF format that includes all of the details of the job such as the number of separations and slugs, the total slug area, the labor and material costs, the total cost of the job, and the location of the registration marks of the slugs and their IDs.

1. From the **File** menu, select **Print Layout Report**.
2. In the Print Layout Report dialog box, in the **File name** box, type a name for the report.
3. Click **Print**.
