

# Packaging Mode Preferences

Use the **Preferences** tabs to set default settings for different operations. These default settings are activated each time you start the software.

1. Select **Edit > Preferences** (Windows) or **Prinergy VPS+ > Preferences** (Mac)
2. If not already in Packaging Mode, go to **Preferences > Mode** and select the **Packaging Mode** radio button. (If you are currently in Commercial Mode you will not be able to view these options. You will have to first select the **Packaging Mode** preference, then press OK to close the Preferences panel and switch the mode. Select **Preferences** again to display all the Packaging Mode options.
3. In the left pane of the Preferences dialog box, click an item to display its options and current settings in the Preferences pane
  - **General**
  - **Mode**
  - **Marks**
  - **Layout**
  - **Unassigned Files**
