

Managing failed uploads

If a file upload fails, you can delete or ignore the failed upload.

1. Locate the job, and select the job name.
2. In the **details panel**, under the **File Uploads** area, click the failed upload marked with red x to delete the failed upload and start the upload again.

To	Do this
Delete the failed upload and start the upload again	Click the red x and in the confirmation dialog box, click OK .
