

Smart Review in Prepress Portal

Smart Review enables you to review a full-resolution preview of a file. When you open a file in Smart Review, you can work with the file in the following ways:

- Change how the file appears in Smart Review
- Work with annotations made to the file
- Compare two different files or compare two revisions of the same file
- Manage color on the file
- Collaborate with others in a group review session
- Review and approve pages
- Print the file to a local printer

The Smart Review user interface consists of six main areas—the **Files** list, the canvas area, view and zoom tools, annotation tools, and panels for job information and approval, and user status.

Number	Area in the Review window
1	Files list
2	Canvas area
3	View and zoom tools
4	Annotation toolbar

5	Information panels (provide detailed information about the file, such as separations and annotation details)
6	Approval and user status panel

Note: Your ability to perform actions in Smart Review depends on your user rights.
