

Adding a horizontal or vertical guide

You can add guides to an image to help accurately position elements in the image.

Note: In a group review session, anyone can view guides, but only the user who created the guides can move them.

1. Add a guide by performing one of the following actions:

To	Do this
Add a horizontal guide	Click Horizontal Guide  , and click the image. When the guide appears, drag it to a new position. While the guide is selected, the distance of the guide from the top of the image is also displayed, in the unit of measure specified in your Smart Review preferences.
Add a vertical guide	Click Vertical Guide  , and click the image. When the guide appears, drag it to a new position. While the guide is selected, the distance of the guide from the left side of the image is also displayed, in the unit of measure specified in your Smart Review preferences.
Move a guide	Note: Only the user who created the guide can move it. Click the guide, and drag it to a new position.
Delete a guide	Perform one of the following actions: • Right-click (Ctrl+click on a Mac computer) the guide and select Delete. • In the Annotations panel, right-click the guide that you want to delete, and select Delete. Guides are removed automatically when you change the file that is open in Smart Review or quit the Smart Review session. Guides are not saved across sessions or included in reports.
