

Viewing the number of annotations associated with a page

In Smart Review, on the right-side of the **Annotations** panel, you can view the number of annotations that have been added to a page.

1. Click **Annotations** to view a detailed list of all annotations.

If you are assigned a role that includes the View All Annotations & Status user right, you can also see the number of annotations added by each user for each page.

Annotation counts contain all the text annotations associated with a specific page, including text annotations that are associated with a line, pen, rectangle, oval, or multishape annotation.
