

Requirements: You must have a system role that includes the Configure Brands right. When you have created a theme that you are satisfied with, you must set theme usage so that your customers see your customizations.

1. In **Themes** area, right-click in the row of the theme you want to make available.
 2. In the menu that appears, select **Edit Theme**.
 3. In the Edit Theme window, in the left pane, click **Customers**.
 4. Choose how you want the theme used:
 - To set the theme as the default theme for the site, select the **Default Site Theme** check box.
 - To make the theme available to specific customers, in the **View** list, select **All Customers** and select the check box next to the required customer names.
- Tip:** Use the View list to filter the list of customers that you see.
5. Click **Update**.
