

Testing the upgraded Prepress Portal satellite software

In order to avoid possible user rights or synchronization issues, the Main (and Standby) Enterprise servers must be turned off or the InSite service must be stopped prior to upgrading the satellites to version 11.5.

Important: Do not proceed to upgrade the main (or standby) enterprise server until you are certain that all satellite servers have been turned off or the InSite service is stopped.

If you need assistance to upgrade to Prepress Portal 11.5, contact your local Response Center representative.
