

Accepting End-User License Agreement (EULA)

When the InSite Prepress Portal Enterprise upgrade process is complete, customers must accept the End-User License Agreement (EULA) on all satellites and main (and standby) enterprise servers.

1. When the upgrade process is complete, on the server desktop, double-click the **InSite Administrator** shortcut.
The EULA page is automatically displayed.
2. If you need to view the EULA and InSite Administration page in a different language, click the **Skip** button.
3. In the language list, select the required language.
The EULA page will be displayed in your selected language.
4. Read the agreement and click the **Accept** button.
Important: Kodak support personnel should click the **Skip** button. Only the customer can accept the agreement.
