

Measuring devices that are supported

You can use one of the following measuring devices for calibrating your monitor with Matchprint Virtual:

- X-Rite i1 Display 3*
- X-Rite i1Basic Pro3 (unfiltered and UV-cut filtered instruments are supported)

***Important:** The retail version will not work for this model. Only the OEM i1 Display 3 model is supported and available for purchase from X-Rite at <https://www.xrite.com/categories/calibration-profiling/i1d3-oem>.

Note: Should the cart not allow for checkout, contact ordersoem@xrite.com to complete the purchase.

This device is not supported for use with UHD (Ultra-High-Definition) monitors and is only recommended for use with new monitors.

Note: Active USB Extension/Repeater cables are not supported for use with the qualified measuring devices.

For Asia Pacific Region (APR) customers only: To purchase the iOneD3 from X-Rite, contact Elizabeth Eidson at <mailto:ordersoem@xrite.com>.

For EAMER customers only:

To purchase the i1 Display 3 (OEM) from X-Rite, contact:

Paul Cooper
WW OEM Business
pcooper@xrite.com
X-Rite Europe GmbH
Althardstrasse 70
CH-8105 Regensdorf Switzerland
Tel: +41 44 8422768

The part number is i1d3DC+OEM.

IMPORTANT: X-Rite support for the following models has been discontinued by XRite:

- X-Rite i1 Pro Rev D (unfiltered and UV-cut filtered instruments)
- X-Rite i1 Pro2 (unfiltered and UV-cut filtered instruments)
- X-Rite i1Basic Pro2 (unfiltered and UV-cut filtered instruments)

While you can still select these instruments in Matchprint Virtual, if there is a color quality issue, Kodak cannot support accurate color with these devices.
