

Assigning color roles

You can assign a role to a user to enable that user to view and approve color-accurate pages in Smart Review.

Your print service provider creates the roles that are available for you to assign to your users.

Note: Any user who needs to view color-accurate pages in Smart Review must have a job role that includes the View Color Management user right.

1. Log on to Prepress Portal.

Note: You must have the Admin role and a job role that includes the Manage Access user right.

2. On the home page, click **Administration**.
3. In the **Administration** area, click **Users**.
4. Right-click the user's name to whom you want to assign color rights, and from the menu that appears, select **Edit User**.
5. In the left pane, select **Default user Role**.
6. In the list of available roles for the **Default Job Role**, select the desired color role from the list.
The role must include the View Color Management user right.
7. Click **Update**.
