

System requirements

Note: System requirements include the ColorFlow Measure Edition

ColorFlow client software has been qualified for the following Windows platforms/OS*

- Microsoft Windows Pro 10 or 11; Microsoft Windows Enterprise 10 or 11; Microsoft Windows Server 2019 or 2022
 - **Compatibility note:*** Microsoft Windows IoT 10 or 11 and Microsoft Windows IoT Enterprise 11 are not qualified.
 - ***Windows 10 Support and Compatibility with ColorFlow 11.6**
 - Standard support for Windows 10 from Microsoft ended in 2025, though customers may choose to purchase extended support directly from Microsoft. Windows 10 has been qualified as a client operating system for use with COLORFLOW 11.6. However, if issues arise that appear to be related to the operating system, Kodak recommends upgrading to Windows 11 for improved support and compatibility.
- To install ColorFlow software, you must have a user account with administrator privileges
- 2 GB RAM (minimum); 4 GB RAM (recommended)
- Quad-Core Intel Core i7 processor
- Adobe Reader software (to display reports)
- Microsoft Visual C++ 2005 Service Pack 1 Redistributable Package ATL Security Update

ColorFlow client software has been qualified for the following Macintosh platforms /OS*

- Mac computer running macOS Sonoma (14.x), macOS Sequoia (15.x), macOS Tahoe (26.x)
- To install ColorFlow software, you must have a user account with administrator privileges
- 2 GB RAM (minimum); 4 GB RAM (recommended)
- Quad-Core Intel Core i7 processor or M1 processor
- Adobe Reader or Apple Preview software (to display reports)

ColorFlow client in a KMS environment

Kodak has not qualified running the ColorFlow Client on an on-premise workstation in a KMS environment, because of communication latency issues between the local ColorFlow client and the ColorFlow database in the cloud.

- The ColorFlow client **MUST** be run on the KMS Azure Primary server or Azure Virtual Desktop.
- ColorFlow Measure Edition running on an on-premise workstation is required to capture chart measurements for import to the ColorFlow client.

Please see [ColorFlow Measure edition](#)

***Compatibility Note:**

It is not economically possible for Kodak to individually qualify every processor model, subtype, or operating system, whether from Apple® or Windows®, Intel®, or AMD. We use current development hardware and software to build and test ColorFlow software. We trust the millions of dollars of compatibility testing performed by the chip manufacturers and operating system vendors to ensure that ColorFlow will perform correctly on all systems.
