

Copy RBA activity files to your workstation

In this task, you will copy to your workstation all of the RBA activity files that you will need to complete this training. When you finish the training, you can remove the files from your system.

1. Locate the activity files on either the RBA Student Resources DVD or on Kodak's Partner Place web portal at <https://partnerplace.kodak.com/>.
2. Download the Rules-Based Automation Activity Files folder directly to your desktop. If you prefer, you can copy the folder to a local server that is accessible to your Prinergy system.
