

Activity 4: Use an RBA manual trigger

Overview

Why you should complete this activity

This activity provides you with further experience using RBA, and demonstrates how to trigger an RBA rule from Job Manager. This activity also demonstrates how to export and import a rule set.

This activity is important because it illustrates how to perform the following tasks:

- Create and use a manual trigger in RBA—*Scenario 1*
- Export and import an RBA rule set—*Scenario 2*

Target Audience

Prepress operators with no RBA experience

Time required

Approximately 15-20 minutes

What you'll learn

After completing this activity, you will know how to perform the following tasks:

- Establish a manual start and refine process
- Change page orientation
- Add a job note
- Save and enable a job rule
- Use a manual trigger
- Disable a job rule set
- Export a rule set
- Delete a rule set
- Import a rule set
