

Activity 5: Use an RBA hot folder trigger

Overview

Why you should complete this activity

This activity provides you with further experience using RBA and demonstrates how to trigger an RBA rule using a hot folder. This activity also demonstrates how to embed PDF preflight processes as part of a job rule.

Target Audience

Prepress operators with no RBA experience

Time required

Approximately 15-20 minutes

What you'll learn

- Create a refine process template
- Create a job rule set with a hot folder drop and add an input process
- Create a preflight PDF report
- Add an e-mail notification
- Save and enable a job rule
- Create a hot folder drop
- Monitor RBA automated processes
- Delete the refine process template
- Delete the hot folder
- Delete the PDF pages and input file
