

Activity 6: Create a system rule set

Overview

Why you should complete this activity

This activity provides you with experience creating and using an RBA system rule. A system rule can be accessed by any job in a Prinergy system.

Target Audience

Prepress operators with no RBA experience

Time required

Approximately 15-20 minutes

What you'll learn

After completing this activity, you will know how to perform the following tasks:

- Create a new group
- Create a system rule set and establish a group change
- Create a dynamic e-mail notification
- Save and enable a job rule
- Monitor the job move and e-mail notification
- Delete the test job and test group
