

# Activity 8: Use RBA flow actions

## Overview

### Why you should complete this activity

This activity introduces RBA flow actions that can be used as part of RBA rule sets. This activity introduces the flow actions that are available in RBA and demonstrates how each can control events or actions in a rule set.

### Target audience

Prepress operators with no RBA experience

### Time required

Approximately 15-20 minutes

### What you'll learn

After completing this activity, you will know how to perform the following tasks:

- Create and use a branch flow action
- Create and use a filter flow action
- Create and use a timer flow action
- Create and use a loop flow action
