

# Create a rule set using a branch flow action

## Scenario

You want to use a **Branch** flow action to automatically generate final output when a job's status is changed to **Completed**.

Follow these procedures to complete this scenario.

- [About branch flow actions](#)
- [Select event and branch conditions](#)
- [Select action results](#)
- [Save and enable a job rule \(Branch flow\)](#)
- [Use the rule set](#)
- [Remove PDF pages and input files](#)
