

# Activity 12: Create a table of values

## Overview

### Why you should complete this activity

This activity demonstrates how to set conditions, so that RBA will perform a different action, depending on which condition has been fulfilled.

### Target Audience

Prepress operators with some RBA experience

### Time required

Approximately 25-30 minutes

### What you'll learn

After completing this activity, you will know how to perform the following tasks:

- Create an email action for output failure
- Create an email action for output success, with a table of values for the To parameter
- Set the Otherwise parameter
