Modify a copy of the remote sender rule set to call the new remote receiver rule set

- 1. Create a copy of the rule set <*XX*>_Rule_Set_XML_Remote_Sender and name it <*X X*>_Rule_Set_XML_Remote_Sender_Custom.
- Modify this rule set so that it calls the rule set <XX>
 _Rule_Set_XML_Remote_Receiver_Custom.

3. Save and enable your new sender rule set **<***XX***>**_ **Rule_Set_XML_Remote_Sender_Custom** in the hub job, named **<***XX***>**_**Hub_Job**.
