Create a new rule set that triggers when the job status changes to In Prepress

1. In Rule Set Manager, create a new rule set.
2. From the **Events** tab, drag the **Job Status Changed** event to the canvas.
3. From the **Flow** tab, drag the **Branch** action over the **Job Status Changed** event resulting action.
4. Set the **Branch** action's condition to `Job -> Status Is In Prepress.`
