

Set a trim box with the Kodak Geometry Editor tool

1. In the **1-Up Artwork** pane, open the newly created PDF file `Label_Grn.p1.pdf` with Acrobat.
2. Click the **Kodak Geometry Editor** button  on the Acrobat toolbar.
Note: In Acrobat Pro, select **View > Tools > Kodak Tools** and then select the **Kodak Geometry Editor** icon from the **Kodak Tools** section of the **Tools** panel on the right. Alternately (on the Mac OS), click the **Tools** tab and then select the **Kodak Geometry Editor** icon from the **Kodak Tools** section of the **Tools** panel on the right.
3. The trim box is blue in color. Observe and record the X and Y trim size coordinates. Move the four blue lines of the trim box inward one by one until they overlap with the die lines of the artwork.
4. Note that the changes of the trim size coordinates. Select **Apply to** and **This page**. Close the Trim Box dialog box.
5. From the **File** menu, select **Save**.
6. Quit Acrobat.
Note: If you have the Enfocus PitStop software installed on your computer, you can use it as an alternative method for setting the trim box.
