Use plate builder to add a varnish separation to the 1-up artwork PDF file

1. Using the Shift key and the **Plate Builder** Tool, select the gray text "**Chocolate Chip**" in the PDF file.

2. Perform one of the following actions:
   - On the **Plate Builder** toolbar, click **Add Selected Objects to Separation**.
   - Right-click the text and select **Add objects to a separation**.
3. In the Add Selected Objects to Separation dialog box, select **Edit separations list** from the **Separation** list.
4. In the Edit Separations dialog box, click **Add**.
5. In the Add Separation dialog box, enter the following data:
   Name: type `Varnish Plate`
   Ink Type: **Transparent**
   Color Recipe: change the color swatch to 100% yellow
   Tint Intensity: leave the intensity at 100%
6. Click **Add**. In the Edit Separations dialog box, click **OK**.
7. In the Add Selected Objects To Separation dialog box, click **OK**.
8. Close the Properties Editor.
9. Save the file and quit Acrobat.
