

For more information about automated imposition

Automated imposition and the related software concepts and tasks are discussed in greater depth in the Prinergy and Preps documentation.

For additional information related to automated imposition:

- For general information about working with Preps profiles, see the Preps Help.
- For Preps information about autogenerating impositions from JDF data, see the *Preps Pro 5.3.2 Auto Signature Creation* technical bulletin.
- For Prinergy information about process templates, integrated Preps, and automated imposition, see the Prinergy Help.
- For summaries of the ICS connectivity features that Business Link supports, see the *Business Link 3.0 ICS Interface Overview* technical document.
