Kodak Prinergy Evo Workflow Client user guide

The PRINERGY EVO Workflow is a powerful solution for controlling prepress production with outstanding performance and output quality. Built on proven PRINERGY PDF processing technology, PRINERGY EVO Software features advanced preflighting, normalizing, color management, trapping, and optimizing.

With an intuitive user interface, self-training, and support, PRINERGY EVO Workflow provides easy, efficient operation with an ongoing low cost of ownership for businesses that currently do not need database-driven job management. Modular and scalable, it is a flexible workflow system that helps streamline processes and reduce the costs of production.

- **Flexible connectivity:** Output to offset and flexographic CTP devices via TIFF workflow, popular proofing devices, and digital presses
- **Uncompromised quality:** Support KODAK Screening Software including STACCATO Screening, MAXTONE Screening and HYPERFLEX Resolution Enhancement Software
- **Reliable high-speed processing:** Increase throughput with powerful, template-based workflow automation and proven PRINERGY PDF technology
- **Greater uptime:** Leverage automatic error reporting, online troubleshooting and best-in-class support to keep your prepress and pressroom running
- **Open integration:** Software options allow you to import imposition information, specify digital print output, and export ink key pre-setting data via JDF
