Managing Prinergy Evo Server

To view the currently-installed version of Prinergy Evo whether, whether the Prinergy Evo Server is running or stopped, and whether the Prinergy Evo Server is licensed, use the **System** tab in the Prinergy Evo Administrator dialog box.

From the **System** tab you can start, restart, or stop the Prinergy Evo Server software.

To revert to an earlier stable state, use the **Reset Prinergy Evo** tool on the **Tools** tab.

If your system appears to be indefinitely stopped, use the **Force Quit** option. Reserve this option for emergencies.
