

Importing multiple process and workflow templates

Use this feature to import process and workflow templates from another Prinergy Evo system.

Imported process and workflow templates can reference color databases, templates for Preps software, and ICC profiles. To make sure that these templates properly work, ensure that any referenced data is available on a network location that can be accessed by other Prinergy Evo server computers.

1. Click the **Tools** tab.
2. Click **Manage Templates**.
3. In the dialog box, select **Import process and workflow templates**, and click **Next**.
4. In the Import Prinergy Evo Templates dialog box, click  to choose a source for the imported templates.
5. Click **Import Now**.
