

Prinerger Workflow Packaging Automation Expansion Pack activity guide - learning description

Overview

Why you should complete this activity

The training material for the Prinerger Workflow Packaging Automation Expansion Pack provides a prepress operator or system administrator with a basic understanding of the packaging workflow and environment. This training includes hands-on practice using the Prinerger Workflow Packaging Automation Expansion Pack tools and tasks, and uses external software and licensed options that work with the system, including, but not limited to, Kodak Pandora packaging layout software and Kodak Packaging Layout Automation software.

The aim of this training material is to build knowledge and familiarity with the Prinerger Workflow Packaging Automation Expansion Pack and to illustrate how this software will work in your specific prepress environment.

Audience

- Senior prepress operators
- Prepress system administrators
- Prepress managers

Time required

The Prinerger Workflow Packaging Automation Expansion Pack Training standard course is approximately five days long; basic training for Packaging Layout Automation operator is approximately two days.

Learner prerequisites

Students should have a good understanding of all working issues in a prepress environment, and possess advanced knowledge of the requirements specific to their own prepress environment.

Number of learners

Classroom: 6-8 per session

On-site: 4-5 per session

Web conferencing with WebEx: 2-4 per session

Instructor skills

To teach this course effectively, you should have in-depth knowledge of Prinerger Workflow Packaging Automation Expansion Pack, understand electronic prepress issues, have experience teaching adults, and have pre-read all materials in this guide prior to a training session.

Coaching skills

This description is relevant for field support specialists and application specialists who support customers during Start-Up Assistance. To coach this course effectively, you should have in-depth knowledge of Prinergy Workflow Packaging Automation Expansion Pack, understand electronic prepress issues, understand prepress workflows, understand fundamental production requirements, and be familiar with the Prinergy Workflow Packaging Automation Expansion Pack training package. A Prinergy coaching session emphasizes the transfer of knowledge acquired through training to the real-world printing environment.

Purpose of this activity guide

The aim of this activity guide is to build fundamental knowledge of Prinergy Workflow, and apply this knowledge in your own working environment.

This guide includes hands-on activities and can be used in a Prinergy Workflow training session or as a self-study guide.

Guiding principles

This guide embodies the following adult learning principles:

- Hands-on practice enables learning by doing.
- You apply new knowledge to your own working environment.
- You participate actively, and are responsible for your own learning.
