

Creating a Dot Enlargement Tag hot folder

Note: See also [Dot Enlargement layout presets](#).

General steps for creating a hot folder

1. Select **Tools > Hot Folder Setup**.
2. In the Hot Folder Setup dialog box, click .
3. Type a name for the hot folder in the **Hot Folders** list, and click anywhere in the dialog box.
4. In the **Input folder** box, click **Select**, locate and select the desired folder (if needed, click  to create a new folder), and click **Select**.
5. To define an output folder for the output TIFF file, click **Select** in the Output folder box, select an output folder, and click **Select**.
6. To delete the input files after the output file is created, select the **Delete input files after output** check box.

Note: You may prefer to retain the original (untagged) input files. To retain the original files in the **Input\Processed Files** subfolder, clear the **Delete input files after output** check box.

Setting up a hot folder for Dot Enlargement tag settings

1. In the **Hot folder type** list, select **Dot Enlargement Tags**.
2. Set the options as needed.
3. Click **Save**.

Hot folder options for dot enlargement
