

Kodak Proofing Software for Matchprint Inkjet (MPI)

MPI 8.3 can be installed on new or existing workstations, as needed. The Proofer Controller software runs only on the Windows operating system. Proofer Client software installers are available for Windows and Mac OS.

Customer-installable direct download installation files are now available on the [Partner Place portal](#).

Note: The version 8.3 installer can be used to upgrade versions 5.2 or later. To upgrade earlier supported versions, you will first need to upgrade to version 5.2.
