

Business Link 7.5 Release notes

Introduction

These release notes describe the changes made in this release of the software. Where applicable, the release notes refer you to additional documents for more information. The latest documentation is available at <https://partnerplace.kodak.com/>.

Licensing

Prinerger Workflow 7.5 and Business Link 7.5 software introduce a new licensing mechanism that merges the (previously separate) Business Link license key with your Prinerger Workflow license. When upgrading to Business Link 7.5, you must also upgrade to Prinerger Workflow 7.5 or later. The Business Link option will be automatically added to your Prinerger license key during the upgrade.

Upgrades to Business Link 7.5 are free of charge for customers who already have a Prinerger Workflow 7.x license or a service contract that includes software upgrades.

Upgrading

If you are running a version of Business Link software earlier than version 3.0, contact your service representative to schedule a remote upgrade.

To upgrade from version 3.0 or later:

1. Download the installer from the Business Link downloads page at https://services.kodak.com/app/answers/detail/a_id/71661 to your Prinerger Primary or Business Link server.
2. Double-click the executable.
3. Follow the instructions in the installation wizard.

Business Link 7.5 software requires Prinerger Workflow 7.5, and is compatible with these operating systems:

- Windows Server 2008 R2
- Windows Server 2012 R2

New installations of Business Link are always performed by Kodak. The software is usually installed remotely. The installation is accompanied by a start-up assistance service that is designed to help you integrate your MIS with Business Link for the purpose of auto job creation and material tracking.

New features and enhancements

This section lists features and enhancements that were added in this release of the software.

New licensing mechanism

Business Link 7.5 introduces a new licensing mechanism that merges the previously-separate Business Link license key with your Prinerger Workflow license. The Business Link license key will be automatically added to your Prinerger Workflow license when you upgrade Prinerger Workflow.

Fixed bugs

This section lists bugs that are resolved in this release of the software.

Referenced ID	Description
LINK-124	Business Link update installer should start with ICS and not NGP
LINK-213	Resubmit does not work if the previous ImpositionPreparation node failed
LINK-270	The Business Link Admin Client required a new label for "Single prepress job per MIS submission"
LINK-273	Names on Business Link strategies needed clarification
LINK-283	Business Link did not support the longer job names from Prinergy 6
LINK-286	Custom Field fails to extract '#' from JDFs through its XSLT transform
LINK-290	Resubmit fail with 308 in case of template ref (Preps issue)
LINK-291	Resubmit failed with JDF from Multipress although there does not appear to be a problem with the file
LINK-292	Custom Fields were not being added to the Custom Fields Manager under the Signature and Imposition Plan views
LINK-299	In certain cases, Preps created two run lists with the same ID

Known limitations

LINK-319: When submitting a specific JDF using Business Link in New Mode (Workspace), the number of pages is doubled in the Workspace **Content** pane.
