InSite Prepress Portal 9.2 new features

New features and enhancements

This section lists features and enhancements that were added in this release.

Support for Windows Server 2019

InSite Prepress Portal 9.2 is now supported on Microsoft Windows Server 2019 Operating System.

Support for integration with InSite Creative Workflow 9.2, Enterprise, PressProof, and MatchPrint Virtual 9.2

Integration with InSite Creative Workflow 9.2; Enterprise; PressProof; and MatchPrint Virtual 9.2 is supported.

Oracle version update

Oracle is updated to version 19.0.0.0

Adobe PDF Library version update

Adobe PDF Library is updated to version 18.

Password reset enhancement

Enhancement for password reset for new and forgotten password users. The **Change Password** dialog will appear on the login page once you have entered your username and temporary password then clicked on the **Login** button, simplifying the password reset requirement.

Smart Review enhancement

"Sort by" (Name, Last Modified Date, Position, Signature) option have been added.

Restricting upload file types

When the restriction is enforced, default file types that can be uploaded for jobs are: `.pdf, .eps, .jpg, .ps, .tif, and .zip`.

Other file types can be 'white-listed' to be uploaded by the site administrator upon request.

Arrange pages on Production jobs

Added a feature to allow arrange pages on Production jobs in Customers' **Job Options** settings.

License Auto Renewal failure notification

Prior to license expiration date, system will automatically attempt to connect to the license server to renew the license. If it fails, system sends an email notification to the Site Administrator to take necessary actions ahead of the expiration date.

Bug fixes

Fixed bugs in InSite Prepress Portal 9.2 - Please refer to the page for details.
