

# Obtaining the software upgrade for the enterprise servers

The InSite upgrade files are available from Partner Place at <https://partnerplace.kodak.com/> (If you are a registered user).

1. Log on to Partner Place.
2. On Partner Place home page, select **Service & Support > Prepress Software Downloads**.
3. In the **Filter by Product** area, select **Unified Workflow > Portal Products > INSITE Prepress Portal System > 9.2**.
4. Click the **InSite Prepress Portal 9.2 - Downloads** link.
5. Perform one of the following actions:

The server that is upgraded	Do this:
Satellite server	<ol style="list-style-type: none"><li>1. On the Downloads page, click the IPP 9.2 Installer link and download the InSite_9.2.0.zip file to the J:\InSiteStuff folder on your InSite satellite server.</li><li>2. Click the Oracle 19.0 installer link and download the Oracle19.0_installer.zip file to the J:\InSiteStuff folder on your InSite satellite server.</li></ol>
Main Enterprise server	<ol style="list-style-type: none"><li>1. On the Downloads page, click the IPP 9.2 Installer link and download the InSite_9.2.0.zip file to the J:\InSiteStuff folder on your main enterprise server.</li><li>2. Click the Oracle 19.0 installer link and download the Oracle19.0_installer.zip file to the J:\InSiteStuff folder on your main enterprise server.</li></ol>
Standby Enterprise server	<ol style="list-style-type: none"><li>1. On the Downloads page, click the IPP 9.2 Installer link and download the InSite_9.2.0.zip file to the J:\InSiteStuff folder on your standby enterprise server.</li><li>2. Click the Oracle 19.0 installer link and download the Oracle19.0_installer.zip file to the J:\InSiteStuff folder on your standby enterprise server.</li></ol>
